-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2627

1) A Request for Continued Examination (RCE) under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/02/2006 has been entered.

2) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3) Claims 1,3,5-8,15,18,20,22-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over WHITE et al (U.S 2005/0049002).

The rejection of claims in previously Office action (date 11/08/2005) .

4) Applicant's arguments filed 3/02/2006 have been fully considered but they are not persuasive.

Applicant states that the prior art of WHITE et al did not show or suggest the feature of " a drive capable of receiving a recordable media having content recorded thereon " and " a transceiver capable of transferring said content converted to another format to a memory of a portable player wherein said converter is actuated via a button located on said interface."

Applicant is directed to paragraph WHITE et al's [0092] which teaches that "[0092] During operation, electronic device 907 may be mounted within interface 904. Electronic device 907 may also be powered or recharged via power line 910 and communicate with the systems audio system via interface cable or bus line 911. Audio information communicated to electronic device 907 may be transferred to audio system 901 such that a user may listen to selected audio information. For example, a user may have previously selected a plurality of audio files to be transmitted to electronic device 907. Electronic device 905 may communicate the selected audio information to the automobiles audio system that utilizes interface 901 thereby allowing the user to listen to selected audio information. In one embodiment, cable 908 may be custom-installed to audio system 901. For example, the cable may be coupled to an auxiliary line

Art Unit: 2627

for the system's radio or may be coupled to CD player line 912 ". As seen on figure 9 and the teaching above, we could see that the cable 908 is coupled to CD player line 912 which is connected to CD player 903, thereafter, the audio files are transferred to portable audio player 907 and the audio from CD player 903 is different format with MP-3 player 907. The reference of WHITE et al, in fact, suggests the features of " a drive capable of receiving a recordable media having content recorded thereon " and " a transceiver capable of transferring said content converted to another format to a memory of a portable player wherein said converter is actuated via a button located on said interface." as claimed.

For that reasons, the claims are still rejectable as shown above.
